

EdgeSmart™

Overview

Transit Pass

EdgeSmart™ is designed to efficiently deliver services to your customers on either stored value payment cards or specialized function smart cards. Flexible, user defined parameters provide for extensive program options. Multiple programs maintained on the same card present opportunities for valuable linked services and effective co-branding.

Secure • Value • Service

Pass features provide:

- repeat customer / new customer counters
- one or two dimension matrix
- up to four types of prepaid reloadable passes
- support for age groups (child, student, adult, senior)
- authorized date and time parameters
- passes can either be active from purchase date or first use
- each pass type can be time blocked ('anti-passback')
- user can define pass duration (days)
- set a different price for each pass in a single or double dimension matrix
- passes can have a usage counter limit
- cards can be 'Hot Listed' and / or 'Disabled'
- card retains last 10 transactions; device retains all transactions
- all transactions date stamped

Pass can contain a reusable or pre-pay disposable secure electronic purse with optional customer PIN, and programs for associated vendors, services and incentives.

Multi-lingual, *EdgeSmart™* supports all major card types and a variety of device platforms (including RF technology). No on-site processor. Off-line data collection option. Remote download capability.

Mass transit, taxis / limousines, contract transportation, parking, road tolls — customer service, customer retention and attracting new clients just got easier with *EdgeSmart™* **Transit Pass**.

EdgeTech® ... Transforming Technology into *Solutions*.
