## Overview

### EdgeSmart™ PARTNER MANAGEMENT

With broad functionality PARTNER MANAGEMENT governs the individual and/or combined structure of participating client programs for loyalty, transit, hospitality and other card venues. Fast, flexible and easy to use, capabilities also include license activation and deactivation processes.

Flexible • Easy • Comprehensive

Features include:

- Partner creation and program options selection
- Update / change plans or values quickly and easily
- Web-enabled centralized solution with remote set-up capability
- Activation card loading and unloading
- Personalization of limited card quantities
- Pre-loading of card scheme values
- Consumer database maintenance
- Formats a User Quick Reference Guide for the program features selected
- Card 'Hot List' capability
- Terminal inventory management
- Automatic billing capability
- Detailed program reporting (i.e.: 'Hot List' reports, terminal reports, transaction statistics)

Access is securely managed through user authentication and password controls.

Multi-application design and combined programs / services capability provide for the implementation and management of extensive and diverse portfolios per card.
